Part I Trauma and the Traumatic Memories (TMs): Manifestations, Mechanisms and Implications

1 Traumatic Memories and the Spectrum of Their Expressions	3
1.1 Introduction	3
1.2 The Many Facets of Trauma and the Spectrum of Their Expression	4
1.3 Impact of Trauma in Early Life and Risk of PTSD, Depression, and Psychosis	6
1.4 Shared Psychopathologies in PTSD, Traumatic Psychosis, and Treatment-Resistant Depression	7
1.5 Therapeutic Role of Meditation in PTSD and Traumatic Psychosis	9
1.6 TIMBER Psychotherapy for Trauma Memories	9
1.7 Conclusion and Future Directions	10
References	11
2 Traumatic Memories (TMs): Neurobiology and Implications	15
2.1 Introduction	15
2.2 Processes Involved in Trauma/Fear Memories	16
2.3 Two Different Memory Systems (Verbal and Non-verbal) in Traumatic Memories	17
2.4 Trauma Memories: The Key Players	19
2.5 The Newer Cognitive Models of PTSD	21
2.6 Clinical Relevance of These Findings	22
2.7 Conclusions and Future Directions	24
References	24
Part II TIMBER Therapy for PTSD, Depression and Traumatic Psychosis: Methodology, Application and Efficacy	
3 Trauma Interventions Using Mindfulness-Based Extinction and Reconsolidation of Memories (TIMBER)	29
3.1 Introduction	29
3.2 Need to Pair the Extinction with Reconsolidation as Done in TIMBER	30

3.3	Need to Combine Many Therapeutic Components as Done in TIMBER	31
3.4	Mechanism of TIMBER Psychotherapy	34
3.5	Unique Features of TIMBER When Dealing with Trauma Memories	34
3.6	Delivery of TIMBER	36
3.7	Stages in TIMBER	36
3.8	The Nuts and Bolts in Applying TIMBER Therapy	37
3.9	Customization in the TIMBER Therapy	38
3.10	Achieving the Meditation Skills Before Exposure Therapy Is the Key	39
3.11	Trauma-Specific Application of TIMBER Interventions in Three Steps	40
	3.11.1 Structure of the 15 Sessions in TIMBER Therapy	40
	3.11.2 Data on the Efficacy of TIMBER	41
	3.11.3 TIMBER Psychotherapy and Biomarkers	43
3.12	Conclusions and Future Directions	44
	References	44
4	Customization and Future Directions in TIMBER	47
4.1	Introduction	47
4.2	Assessment Tools	49
	4.2.1 Assessment Scale for Mindfulness Interventions (ASMI®)	49
	4.2.2 The Arousal Response to Trauma Memory Reactivation (ART-MR®) Scale	52
4.3	Meditation Home Practice Log	55
4.4	Three Aspects of the TIMBER Psychotherapy	56
4.5	Conclusions and Future Directions	57
	References	58
5	Discussion and Illustrations of the Therapeutic Processes in TIMBER	59
5.1	Nosological and Diagnostic Problems in Trauma Care	59
5.2	Some Problems with the Current System of Care	60
5.3	Some Proposed Solutions to These Problems	61
5.4	How TIMBER Differs from the Contemporary Trauma Therapies?	62
5.5	A Case-Based Illustration of TIMBER	63
5.6	Conclusion	65
	References	66

Part III Training, Policy and Cultural Aspects of TIMBER

6	Cultural Considerations in Applying TIMBER Therapy	69
6.1	Introduction	69
6.2	Cultural Diversity Is the Norm	71
6.3	Culture and Trauma	72
6.4	Culture and Health Services	74
6.5	Conclusions	79
	References	79
7	Therapist Training on TIMBER and Policy Implications	81
7.1	Current Healthcare System Globally	81
7.2	High- and Middle-Income Countries (HMIC)	83
7.3	Low- and Middle-Income Countries (LMIC)	84
7.4	Trauma and Health.	85
7.5	Importance of Early Intervention.	86
7.6	Bringing the Different Teams Together (Integrated Care).	87
7.7	Impact of Trauma on Staff.	87
7.8	Addressing the Fragmented Care.	88
7.9	CCBHCs: Future of Integrated System of Care for the United States	89
7.10	Module for Training the Professionals on the TIMBER Psychotherapy	89
7.11	Future Directions for Research	91
7.12	Conclusion	92
	References	92
