PART I. POLICY

1. EU Policy on Capacity Mechanisms	3
1.1 Why capacity mechanisms? The missing money problem and RES capacity	3
1.2 Core features of capacity mechanisms	7
1.3 The EU approach to capacity mechanisms before the 20/20/20 Package	16
1.4 The EU approach to capacity mechanisms after the 20/20/20 Package (and before the November 2013 Communication)	18
1.5 The November 2013 Communication	22
1.6 Conclusion—where next with capacity mechanisms in the EU?	30
2. The Regulators’ View: ACER’s Report on Capacity Mechanisms and the EU Internal Electricity Market	32
2.1 Introduction	32
2.2 The contribution of energy-only markets to generation adequacy	33
2.3 Impact of capacity mechanisms: design and distortions	35
2.4 Cross-border participation in capacity mechanisms	37
2.5 Conclusions and recommendations	38
3. Capacity Mechanisms in the European Market: Now, but How?	40
3.1 Introduction	40
3.2 The pervasive impact of capacity mechanisms on the remuneration of flexibility	41
3.3 The costs of self-sufficient capacity mechanisms	44
3.4 A framework for coordination of national capacity mechanisms at EU level	48
3.5 Conclusion	54

PART II. ECONOMICS

4. Energy Market Design with Capacity Mechanisms	59
4.1 Introduction	59
4.2 Energy-only market—can it be sustainable?	60
4.3 What are the policy options—and how would they perform?	67
4.4 How do renewable energies fit into the market design?	72
4.5 What are the challenges in the EU context?	75
4.6 Summary—when to use which capacity mechanisms?	76
5. Different Approaches for Capacity Mechanisms in Europe: Rationale and Potential for Coordination?	79
5.1 Introduction	79
5.2 A patchwork of capacity mechanisms in Europe: different designs fit different needs	80

5.3	Toward coordination of capacity mechanisms in Europe	81
5.4	Capacity mechanisms and the new EEAG 2014–2020: Key issues	86
5.5	Coordinating capacity mechanisms in Europe	89
5.6	Conclusions	93
6.	Capacity Mechanisms and Cross-Border Participation: The EU Integrated Approach in Question	95
6.1	Elements of the EU debate on cross-border participation	95
6.2	Explicit cross-border participation with congested capacity of interconnections	102
6.3	Social efficiency of cross-border participation from the national perspective	106
6.4	Social efficiency of cross-border participation from the EU perspective	110
6.5	Conclusion	117
7.	The System Adequacy Problem: Lessons Learned from the American Continent	119
7.1	Introduction	119
7.2	Design elements	121
7.3	Target market	121
7.4	Lag period (or lead time)	127
7.5	Contract duration	128
7.6	Defining the requirements associated with the ‘reliability product’	130
7.7	Indexation and warranties	136
7.8	Summary and high-level recommendations	138
8.	The Generation Mix, Price Caps, and Capacity Payments	140
8.1	Introduction	140
8.2	Optimal generation mix	141
8.3	A competitive market leads to an optimal generation mix	145
8.4	A price cap distorts investment levels	147
8.5	Capacity payments restore efficiency	149
8.6	Renewable energy and demand participation	150
8.7	Conclusion	153
PART III. LAW		
9.	Capacity Mechanisms and State Aid Control: A European Solution to the ‘Missing Money’ Problem?	157
9.1	Introduction	157
9.2	Policy evolution	158
9.3	Funding capacity mechanisms: When do the state aid rules apply?	162
9.4	Compatible support—the new EEAG 2014–2020	171
9.5	Assessment	175
9.6	Conclusion	181
10.	Antitrust Law: A Missing Piece in a Regulatory Puzzle?	182
10.1	Introduction	182
10.2	EU antitrust enforcement in the energy sector—a primer	183
10.3	A typology of antitrust issues related to capacity mechanisms	185
10.4	The problem with the market definition	187
10.5	Selected anticompetitive practices under Articles 101 and 102 TFEU	189
10.6	Conclusions	200

11. Free Movement of Goods in the Labyrinth of Energy Policy and Capacity Mechanisms	201
11.1 Introduction	201
11.2 Energy as goods	202
11.3 Free movement of goods and state aid	203
11.4 Free movement of goods: Restrictions	203
11.5 Free movement of goods: Justification	210
11.6 Conclusion	223
PART IV. CASE STUDIES	
12. Austria	227
12.1 Introduction	227
12.2 Setting the scene	227
12.3 Energy-only market	235
12.4 European dimension	237
12.5 Conclusion	240
13. Belgium	241
13.1 Introduction	241
13.2 Setting the scene	241
13.3 Capacity mechanism	245
13.4 European dimension	253
13.5 Conclusion	255
14. France	256
14.1 Introduction	256
14.2 Setting the scene	256
14.3 Capacity mechanism	258
14.4 European dimension	264
14.5 Conclusion	270
15. Germany	271
15.1 Introduction	271
15.2 Setting the scene	271
15.3 Energy-only market and network reserve	276
15.4 European dimension	285
15.5 Conclusion	287
16. Greece	288
16.1 Introduction	288
16.2 Setting the scene	288
16.3 Capacity mechanism	293
16.4 European dimension	297
16.5 Conclusion	301
17. Italy	302
17.1 Introduction	302
17.2 Setting the scene	302
17.3 Capacity mechanism	306
17.4 European dimension	310
17.5 Conclusion	313

18. Netherlands	314
18.1 Introduction	314
18.2 Setting the scene	314
18.3 Energy-only market and the European dimension	318
18.4 Conclusion	320
19. Norway	321
19.1 Introduction	321
19.2 Setting the scene	321
19.3 Energy-only market	325
19.4 European dimension	331
19.5 Conclusion	334
20. Poland	335
20.1 Introduction	335
20.2 Setting the scene	335
20.3 Energy-only market, capacity measures, and a 'capacity debate'	342
20.4 European dimension	347
20.5 Conclusions	349
21. Spain	351
21.1 Introduction	351
21.2 Setting the scene	351
21.3 Capacity mechanism	356
21.4 European dimension	363
21.5 Conclusion	364
22. United Kingdom	365
22.1 Introduction	365
22.2 Setting the scene	365
22.3 Capacity mechanism	370
22.4 European dimension	380
22.5 Conclusion	382
<i>Index</i>	383
