

Contents

Part I Forensic Case Work

1 Historical and Procedural Overview of Forensic Speaker Recognition as a Science	3
Kanae Amino, Takashi Osanai, Toshiaki Kamada, Hisanori Makinae and Takayuki Arai	
2 Automatic Speaker Recognition for Forensic Case Assessment and Interpretation	21
Andrzej Drygajlo	
3 Aural/Acoustic vs. Automatic Methods in Forensic Phonetic Case Work	41
Anders Eriksson	
4 Speaker Profiling: The Study of Acoustic Characteristics Based on Phonetic Features of Hindi Dialects for Forensic Speaker Identification	71
Manisha Kulshreshtha, C. P. Singh and R. M. Sharma	

Part II Speech Signal Degradation: Managing Problematic Conditions Affecting Probative Speech Samples

5 Speech Under Stress and Lombard Effect: Impact and Solutions for Forensic Speaker Recognition	103
John H. L. Hansen, Abhijeet Sangwan and Wooil Kim	
6 Speaker Identification over Narrowband VoIP Networks	125
Hemant A. Patil, Aaron E. Cohen and Keshab K. Parhi	

7	Noise Robust Speaker Identification: Using Nonlinear Modeling Techniques	153
	Raghunath S. Holambe and Mangesh S. Deshpande	
8	Robust Speaker Recognition in Noisy Environments: Using Dynamics of Speaker-Specific Prosody	183
	Shashidhar G. Koolagudi, K. Sreenivasa Rao, Ramu Reddy, Vuppala Anil Kumar and Saswat Chakrabarti	
9	Characterization of Noise Associated with Forensic Speech Samples	205
	Jiju P. V., C. P. Singh and R. M. Sharma	
10	Speech Processing for Robust Speaker Recognition: Analysis and Advancements for Whispered Speech	253
	John H. L. Hansen, Chi Zhang and Xing Fan	
Part III	Methods and Strategies: Analyzing Features of Speaker Recognition to Optimize Voice Verification System Performance in Legal Settings	
11	Effects of the Phonological Contents and Transmission Channels on Forensic Speaker Recognition	275
	Kanae Amino, Takashi Osanai, Toshiaki Kamada, Hisanori Makinae and Takayuki Arai	
12	Aerodynamic and Acoustic Theory of Voice Production	309
	T. V. Ananthapadmanabha	
13	Prosodic Features for Speaker Recognition	365
	Leena Mary	
14	Speaker Identification Using Intermediate Matching Kernel-Based Support Vector Machines	389
	A. D. Dileep and C. Chandra Sekhar	
Part IV	Applications to Law Enforcement and Counter-Terrorism	
15	Speaker Spotting: Automatic Telephony Surveillance for Homeland Security	427
	V. Ramasubramanian	
16	Helping the Forensic Research Institute of the French Gendarmerie to Identify a Suspect in the Presence of Voice Disguise or Voice Forgery	469
	Patrick Perrot and Gérard Chollet	

Contents	xvii
17 Applying Lessons Learned from Commercial Voice Biometric Deployments to Forensic Investigations	505
Chuck Buffum	
18 Designing Better Speaker Verification Systems: Bridging the Gap between Creators and Implementers of Investigatory Voice Biometric Technologies	511
Avery Glasser
